# Animation Techniques

## Animating People

One of the easiest and quickest ways to create a stop motion animation is to use people as your subject matter. Simply gather together a group of friends and spend a hilarious few hours creating a masterpiece.

You can animate your friends in whatever way you wish. Make your friends float across the room by taking a photograph every time they jump; or create a racetrack, get your friends to sit on stools (racing cars) and animate your very own Grand Prix!

The possibilities are endless, so be as creative as you can!

---

*Idea! Create an animation of someone riding a broomstick around the garden.*
